

Data Scientist – AI & Analytics

Company: NexaVision Technologies

Location: Bengaluru, India (Hybrid)

Employment Type: Full-Time

Job Summary

NexaVision Technologies is seeking a highly motivated Data Scientist to join our AI & Analytics team. The candidate will work on real-world machine learning problems involving predictive analytics, NLP, recommendation systems, and business intelligence solutions.

Key Responsibilities

- Develop and deploy machine learning models for business applications.
- Perform data preprocessing, feature engineering, and model evaluation.
- Work with large datasets using Python, Pandas, NumPy, and SQL.
- Collaborate with engineering and product teams to integrate AI solutions.
- Build NLP and recommendation system pipelines.
- Create dashboards and insights using visualization tools.

Required Skills

- Strong knowledge of Python programming.
- Experience with Scikit-learn, TensorFlow, or PyTorch.
- Understanding of Machine Learning and Deep Learning concepts.
- Knowledge of NLP techniques and model evaluation.
- Familiarity with SQL and database systems.
- Strong communication and problem-solving skills.

Preferred Qualifications

- | |
|--|
| • Bachelor's or Master's degree in Data Science, Computer Science, or related field. |
| • Experience with Flask or FastAPI. |
| • Knowledge of cloud platforms like AWS or Azure. |
| • Portfolio or GitHub projects in AI/ML. |

Salary & Benefits

- | |
|---|
| • Competitive salary package. |
| • Hybrid work flexibility. |
| • Health insurance and wellness programs. |
| • Learning and certification support. |
| • Performance bonuses and growth opportunities. |
